

**Data protection  
keeps changing.  
New risks keep  
emerging.**

**This is how you  
stay compliant.**

**BPE Global Privacy Hub**

**#GlobalPrivacyHub**

In a constantly evolving data protection landscape, a pragmatic, business focused strategy, specialist knowledge and a clear view of the global picture are essential to make sure your business remains fully compliant.

## Introducing the BPE Global Privacy Hub

Since the introduction of GDPR, businesses face the ongoing challenge of data protection compliance.

For UK based businesses trading outside the UK, simply complying with the UK law requirements is not enough to minimise real risks because other data protection laws will most likely apply too.

Equally, non-UK based organisations trading with individuals in the UK, should expect to have to comply with the UK privacy laws.

Our Global Privacy Hub will help you to identify which data protection laws you need to comply with and how to achieve a higher level of compliance.

**We are committed to making  
life easier when it comes  
to privacy and data protection.**

# Expert, accessible, affordable

BPE's Global Privacy Hub is a cost-effective, off-the-shelf solution designed to assess risk, implement ongoing monitoring and evaluation mechanisms, and meet every requirement in the specialist area of data protection. It provides expert guidance, personal and technical support, multi-jurisdictional legal advice and greater clarity if you do business in the UK or overseas.

BPE's comprehensive, simplified package delivers the assurance you need while legislation continues to evolve.

## Benefits of BPE's Global Privacy Hub

1

### Protect your reputation

The Global Privacy Hub puts your business in a stronger position to publicly demonstrate a higher level of effective compliance, compared to businesses without a specialist support potentially unaware of the real risks they face.

2

### Reduce the impact of an incident

The Global Privacy Hub provides a tailored, clear and streamlined process to follow in the event of a data breach. This includes steps to communicate to individuals internally and to notify local and foreign data protection authorities, enabling you to manage and minimise the impacts of a breach across your global network.

3

### Reduce fines

You are under obligation to demonstrate compliance and will face further scrutiny if you are investigated following a complaint or an unexpected breach. It is, therefore, essential to keep privacy documents organised, accessible and updated. The Global Privacy Hub can give you peace of mind that this will be done consistently and thoroughly.

4

### Maximise the value of insurance policies

The Global Privacy Hub will help you demonstrate to insurers that you have taken the right steps to ensure compliance; meaning potential reductions in your insurance premiums.

5

### Save time and money

Keeping on top of legislation in a constantly changing legislative landscape is time consuming, especially when your business trades in multiple jurisdictions. The Global Privacy Hub is constantly updated – we do it, so you don't have to.

Are you effectively minimising the risks for your organisation?

# Using the Global Privacy Hub: Three Services for you to combine as you need

Every client using the Global Privacy Hub will have different needs and therefore face different levels of risk. We offer three tiers of services to tailor our support to your needs: From equipping you with greater knowledge and setting up a platform for easier management of your evidence records; to reviewing and implementing procedures and documents while bringing expert legal and technical support to your team. Our core services are designed to strengthen your business' current level of compliance.

## 1 Basic

This level of service simplifies the complex area of data protection for non-expert users, leaving you with practical compliance rules that are easy to follow, while helping your business to comply with the basic global legal requirements.

## 2 Platform

This level of service helps you to comply with your accountability obligations. We provide you with a platform or integrate with your existing platform. We ensure that all relevant documentation is compiled and accessible.

But this is not only a document sharing platform service. We regularly add legal updates and ensure that internal and external stakeholders are able to quickly communicate with each other, a crucial element to ensure an effective compliant structure.

## 3 Expert Team

With this level of service, we work alongside your team in complex matters requiring niche legal and technical expertise, for example, carrying out complex international transfer risk assessments, advising on anonymisation techniques or using AI tools and blockchain. We also provide data protection representative services in foreign territories and DPO support as necessary.
